VoiceThread: Talking in the Clouds
What is VoiceThread?

• VT is an external tool in Canvas.
• It allows teachers and students to easily create voice annotations over visual media; over e.g. video, images and PowerPoint by using a microphone, a webcam or mobile device.
What can VoiceThread do in an educational setting?

- Promote asynchronous interaction, collaboration and community building beyond the standard classroom.
- Can be used to develop the students’ presentational, storytelling, commentary and critical thinking skills.
Interpret Images
Tell Stories
What else can VoiceThread be used for?

- to deliver instruction with voice-over PowerPoint presentations which students can engage with, respond to and comment on
Voice-Over PowerPoints
Where can I find VoiceThread and how can I create it?
