Disgust

Data: Highest levels of disgust reported from images most associated with infection.

*Hypothesis: Disgust is innate, it evolved by protecting us from infectious disease.*
Which grandparent do you feel closest to?

- Paternal grandfather
- Paternal grandmother
- Maternal grandmother
- Maternal grandfather

Development of concepts
Rorschach inkblot

What did you see?

When poll is active, respond at PollEv.com/psych001
Text PSYC001 to 22333 once to join
All data are not equal.

Each Rorschach response is unique.

To compare people’s responses to inkblots is not the same as contrasting neuroticism scores.
We identified the same thing.

Grandparents

Data: Greatest investment and closeness from maternal grandmothers.

*Extension of inclusive fitness theory:* Maternal grandmothers have greatest confidence in their genetic relatedness. Paternal grandfathers have the least.
