

Recording Videos Using Camtasia Studio 8

1. Open Camtasia Studio 8. [You can do so by right clicking the start menu in the bottom left corner and searching for the app.] In the top menu, select Tools and then Record Camera.

2. Under Available Video Devices, click the drop-down. To record from the webcam under the monitor, select 'Logitech HD Pro Webcam C920.' To record from the ceiling camera, select 'UVC Camera.'

UVC Camera

3. A live preview of the Web camera appears on the screen, and you can adjust your camera as needed.

To adjust ceiling camera, borrow remote from Vitale Digital Media Lab located at the end of the hall.

4. Click Start Recording to start, and then Stop Recording to end your recording. A box will pop up that asks you to save your video capture. You can save your video as a .wmv (Windows Media Video) file.

5. After saving the file, choose the size dimension (1280 x 720 YouTube & Screencast) from the dropdown menu that appears.
